

Woven Material

IBL650

Description:

IBL650 is a flexible woven, non-asbestos friction material and is light brown in colour. The material itself is based on yarns and fibres tightly spun around a brass wire to give excellent friction stability and provide high performance across a wide temperature range.

Availability:

The material is available in flexible roll.

Applications:

- Light and heavy industrial applications
- Marine and towing winches
- Cranes
- Hoists
- Miscellaneous industrial friction uses

Bonding & Mating Surfaces:

IBL650 can be bonded using any established adhesive recommended for friction material
