

Moulded Sheet

IBL6110

Description:

IBL6110 is a rigid, moulded asbestos free friction material and is grey in colour. IBL6110 is resin based, with steel and copper content, giving great performance and stability over a considerable temperature range.

Availability:

The material is available in the form of flat sheet, blocks, pads and disc.

Applications:

- Heavy duty industrial machinery
- Geared clutch and brake discs
- Brake blocks
- Friction segments

Bonding & Mating Surfaces:

Any established adhesive recommended for friction material. Ideal mating surface is perlitic cast iron.
